

# OUTDOOR LIVING

SUN AND WEATHER PROTECTION SYSTEMS

# TRADITION & INNOVATION

«Courage is the first step to any great achievement.» (Johann Wolfgang von Goethe)

## 1964 FOUNDING

What started 50 years ago with considerable courage in an old cider cellar has today become a leading, global manufacturer of sun and weather protection solutions with production facilities in Switzerland.

## FUNCTIONALITY & TECHNOLOGY

Our many years of experience and close cooperation with specialists, architects, planners and dealers enable us to develop innovative products that meet the highest demands. – Yesterday, today and tomorrow.

## AESTHETICS & DESIGN

Emotions turn our daily routine into an adventure. The influence of colors and forms play a central role in this. Therefore, STOBAG awnings are customised for you.

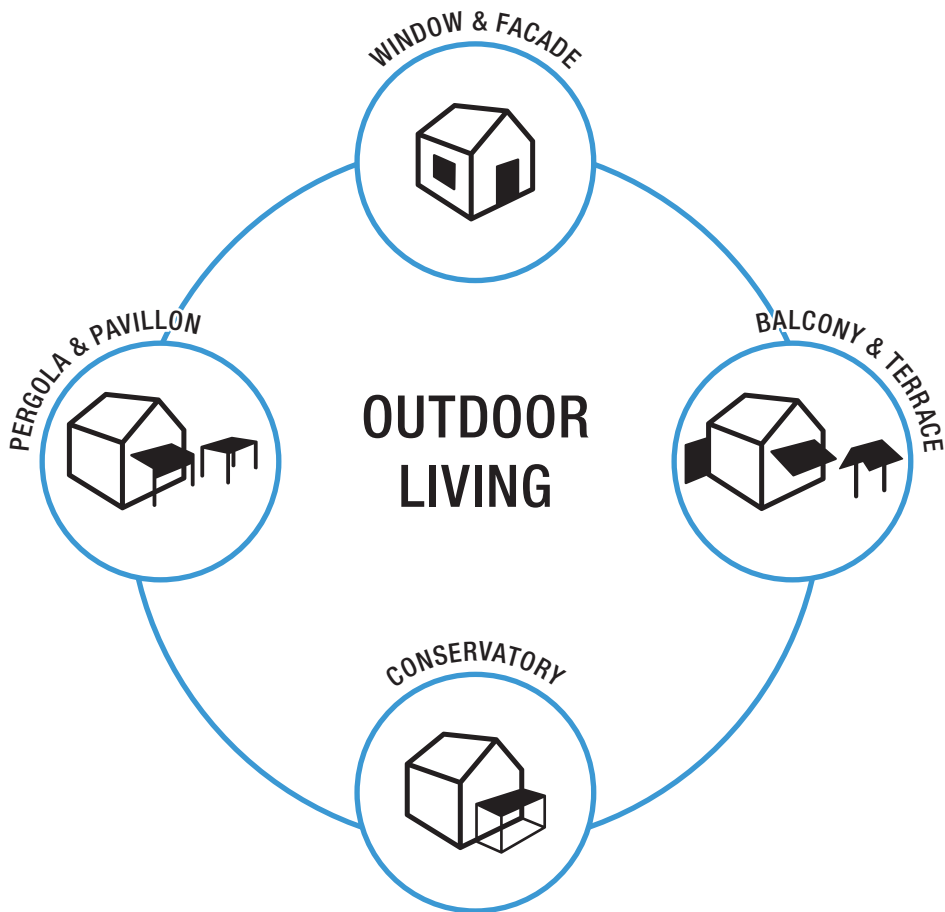

## QUALITY & SAFETY

The Gremaud family guarantees you durable, tailored products in uncompromising quality. We achieve this through the consistent use of high-quality materials, modern and environmentally sustainable production processes as well as continuous safety inspections.

# STOBAG PRODUCTS & SERVICES

Individual product solutions tailor-made for you.

## WINDOW & FACADE

More environmentally friendly than any air-conditioning system: Our facade awnings offer perfect protection against heat and prying eyes.

### THE BENEFITS TO YOU

Window and facade awnings also allow you to regulate the amount of light that shines directly into your rooms. The insulating air cushion between the awning fabric and the window provides effective heat protection. Owing to the large selection of cloth and frame colors, products are not only used for thermal insulation, but also as design features in the architecture.

### YOUR ADVANTAGES

- Choice of guide types and box shapes
- Vertical awnings without lateral light gap (SIR technology)
- Wind-resistant to 75 mph
- Daylight control without direct exposure to light
- Stylish alternative to roller blinds and lamellas

## BALCONY & TERRACE

Make your terrace or your balcony a superb, private holiday destination!

### THE BENEFITS TO YOU

People like to spend most of their free time and time together on their terraces and patio – starting from the first warm rays of sunshine in spring until well into autumn. The right choice of sun and weather protection system ensures a pleasantly cool climate and excellent UV protection. Sometimes you don't just want protection from the sun when you're on the terrace or balcony but also from prying eyes or annoying draughts. STOBAG lateral shading systems were developed for this very purpose.

### YOUR ADVANTAGES

- Choice of round or square boxes
- Telescopic arm technology for constant high cloth tensioning
- Drop down valance as glare protection when the sun is low

# PERGOLA & PAVILLON

Enjoy the outdoors in sunshine or rain: STOBAG terrace awnings & pavilions are hardwearing and provide extra space in the open air.

## THE BENEFITS TO YOU

Terrace awnings offer a lot of benefits for fresh air fans. Frontal support makes the systems very stable. With sufficient incline and fitted with a waterproof cover they not only provide shade but are also ideal for use in the rain.

There are a number of product solutions to choose from depending on the particular application, desired dimensions and aesthetic appeal, even free-standing stylish pavilions.

### YOUR ADVANTAGES

- Custom designed living space extensions
- Choice of fabric or aluminium lamellas
- Integrated water run-off system
- Side shading

# CONSERVATORY

Tropical temperatures in the conservatory? STOBAG awnings provide the optimal climate and a perfect atmosphere.

## THE BENEFITS TO YOU

Glass annexes and conservatories are still very much the trend. However, the great challenge here lies in maintaining the perfect temperature and lighting. While the winter rays of sunshine can be enjoyed behind glass, they quickly become unbearable for inhabitants and plants in spring. To prevent your glass oasis becoming a greenhouse, STOBAG offers tailored conservatory awnings

for the roof as well as the vertical areas. An electric drive, integrated as standard, offers operating comfort and, thanks to the optional automatic sun/wind protection, your conservatory is cooled automatically when outside temperatures start to increase.

## YOUR ADVANTAGES

- Unique conservatory shapes do not present a problem thanks to extending guide rails
- Horizontal shadowing

# AWNING ACCESSORIES & OPTIONS

More individuality and convenience with additional options.

## FRAME COLORS

STOBAG profiles and frame components are powder-coated to ensure you can enjoy your sun and weather protection systems in the years ahead as much as on the day they arrived. This environmentally-friendly process offers effective protection for the structure against environmental and weather factors. The maximum possible degree of colour uniformity in an endless array is guaranteed by the highest quality standards.

## COVER DESIGNS

By choosing a fabric from the STOBAG Collection from European quality weaving mills, you have opted for a top quality high-tech textile product. Let yourself be inspired and enticed by our extensive colour range and the special characteristics of our UV tested acrylic fabrics.

## AUTOMATIONS AND CONTROLS

We offer you exactly the comfort that you want from your individual awning system, with simple sun, wind and rain sensors creating a natural environmentally controlled air conditioning system. Whether you extend an awning via remote control or want to control the façade and conservatory shading by smartphone: Our reliable automatic systems master any situation.

# INDIVIDUAL SUN AND WEATHER PROTECTION FOR YOUR PERSONAL OASIS OF WELL-BEING.
